3. A Russian order was received in late September for 10,000 power-measuring lamps (Leistungs-Messlampen). Immediate delivery was requested. 2,000 of each of the following types were ordered:

8-12 cm, 10-W	
8-12 cm, 40-W	These are variants of the
9-20 cm, 60-W	OSJ tube type 2103.
10-20 cm, 20-W	
25-50 cm, 120-W	

4. The following tubes have been decided on for use in the television receivers to be manufactured by the Sachsenwerk, Radeberg. The list is not yet complete.

500 sets of tubes (to equip 300 receivers with spares) are to be manufactured by the OSJ during 1950.
80,000 sets of tubes (to equip 40,000 receivers with spares) are to be manufactured during 1951.

(Note: * denotes that no equivalent OSW tube exists, and that this type will therefore have to be developed.)

5. Delivery of the IR 260 K* X-ray tubes has been delayed because of a lack of nickel. Only two were delivered in September instead of the 15 planned. A consignment of nickel arrived at the end of the month from the Kupfer- und Messingwerke, Hettstedt, which belongs to SAG Marten, and the backlog will probably be made up during October.

6. The Russian orders for the IR 260 K X-ray tubes, and for the sets of tubes for the Radeberg television sets are at present top priority in the tube factory. They are the only orders which have the priority grading T.2.

* Comment: This is the correct nomenclature for these tubes which have been previously erroneously labeled JR 260 K.
